About Oracle® ADF

Many Oracle® customers are now looking for the next major step for the next 20+ years of their software investments, and C3 Alliance's Tools and expertise enables us to offer the best Oracle® Forms platform alternative - Oracle®ADF.

Oracle® ADF is an end-to-end Java EE framework that simplifies application development by providing out of the box infrastructure services and a visual and declarative development experience.

Java EE is a standard, robust, scalable, and secure platform that forms the basis for many of today's enterprise applications. Java EE provides a set of specifications for building multi-tier applications using the Java ™ language. In the past, there was a direct correlation between the robust nature of an application to the complexity required to achieve it. However, with the advent of the Oracle® ADF framework, you are able to provide the implementation of extremely rich Java EE applications, adhering to standard patterns and practices with greatly reduced effort.

About C3 Alliance

C3 Alliance is an Information Technology (IT) firm focused on the delivery of superior Oracle® services. C3 Alliance's Forms and Oracle-ADF experts provide unique Oracle® Forms modernization solutions; offering highly automated Oracle® Forms migration tools and services that result in successful Forms upgrade from any earlier version to 10g, 11g or to Oracle-ADF.

Proven Forms to Oracle® ADF Migration Solution

ORMIT JAVA/ADF

Many companies today have invested substantial time and effort over the last decade in developing critical and large-scale Oracle Forms applications. These same corporations also interested in moving ahead with technology advances and are looking for a way to convert these applications into a true web based environment. Oracle has developed ADF as its core infrastructure J2ee framework and ADF now is a true integral component of the Oracle Fusion product stack. C3 Alliance can provide your company with strategic Oracle Forms to Oracle ADF migration and conversion services and assist you in modernizing your application set. We offer a complete set of services in this area and have a technical staff that is very experienced in this specialized area.

C3 Alliance Value

C3 Alliance has developed an approach that does not constitute using any third party libraries or proprietary software; you, the customer, get a deliverable which is pure Oracle ADF/BC4J and which is then directly supportable and easily readable for your development staff. C3 Alliance also insures that our customers are involved in each and every decision that has to made during the migration process; we also are project and detailed oriented and insist on formal test procedures to be written up and used as our benchmarks for final delivery and customer sign off.

C3 Alliance has chosen not to emulate its competitors by simply not offering a fully automated conversion tool approach to the marketplace. Typical conversion tools do not produce output that can be readily understood by developers and support personnel and never creates full proof and completely workable code, i.e. conversion tool output must be heavily modified afterwards to satisfy full application functionality, and changes to conversion tool output must follow the patterns and standards of the given vendor. All fully automated migration tools suffer from the same problematic, their input being Oracle® Forms objects, the output inevitably becomes Oracle Forms oriented – Instead, C3 Alliance ensures that the Oracle®ADF code is 100% compliant to Oracle®ADF best practices. We therefore believe wholeheartedly that our approach offers a more holistic and strategic approach to our customers.

No Shortcut, No Compromise, Simply Pure Oracle® ADF.

Oracle Forms to Oracle ADF High Level Object Related Conversion Areas Addressed:

• Forms Menus
• Forms Blocks
• Forms Items
• Forms Popups
• Forms Triggers
• Form/Block/Item
• Stored Procedure and Function Usage
• Forms Global Usage
• Forms Error Handling

C3 Alliance incorporates the use of JavaScript and ADF task flows during its migration process to address various issues that do not have a direct correspondence in the ADF area as compared to its Forms counterpart. We use our own internally built tools for our own internal processes and procedures within our migration services framework.

Offered Services

Oracle Forms Application Review and Detailed Analysis
C3 Alliance can provide you with a detailed inventory of your complete application associated objects and a complete roadmap in how you will be able to achieve your ADF migration

Oracle Forms to Oracle ADF Turnkey Migration and Conversion Services
C3 Alliance can provide a complete Oracle Forms to Oracle ADF migration solution for you where we take on all responsibilities including project management, application inventory/object analysis, testing, documentation, re-engineering requirements, and addressing all security integration issues.

Oracle ADF Training and Education
C3 Alliance offers a very comprehensive ADF training course geared towards Oracle Forms developers within includes these major areas :
• Oracle ADF
• Oracle Weblogic Server
• Security and Oracle ADF security related issues

Code Re-engineering
C3 Alliance can assist you in determining what elements of your application you may need to re-engineer or potentially re-write with specific regard to your ADF migration

In summary C3 Alliance has both the experience and expertise to be known as the overall leader in Oracle® Forms to Oracle® ADF conversions. It is our intention to both provide our customers with qualitative and optimal quantitative solutions, stellar consulting services, and upmost, strategic knowledge transfer to our end customers which is inherent to our overall process.
